The report portal supports the possibility to export to well-known file formats

GO.Reports can help you make the right decisions. You get accurate information targeted relevant employees in real time regardless of time and place.

Full production overview with GO.Reports

ports drill down functions and
of linking different reports and
formats such as PDF and Excel

How do I find accurate information about the production?
How do I convert complex data into useful information?

What do you achieve?

The GO.Reports module is a dynamic reporting engine that combines complex data and converts it into information, which you and your organisation can use to drive your decision making.

GO.Reports gives you accurate information targeted relevant employees in real time - regardless of time and place. GO.Reports ensures vital and valuable information from selected aspects of the company. The system is well suited for all kinds of production.

GO.Reports ensures access to important and valuable information from the production, including planning, quality, production progress, process performance and many other important KPIs.

The value you get

- Accurate information
Get accurate information targeted relevant employees in real time regardless of time and place
- Your reports - everywhere
The report portal is both desktop and web based and can be accessed on a PC or on mobile devices through a standard web browser
- Full overview
You will always have important and valuable information from the production, including planning, quality and production progress at hand
- Moveable knowledge
Go.Reports makes it possible to link data, automatically send data and export different reports to well-known file formats such as PDF and Excel

FRONTMATEC

Frontmatec develops world-leading customized solutions for automation in the food industry, other hygiene sensitive industries and the utilities industry. We are especially renowned for our high-quality systems for the entire value chain of the meat industry – from carcass grading, slaughter lines, cutting and deboning lines, hygiene systems and control systems, to logistics and packaging.
