Dear Henrik,

**Re: AUTOFOM III P2 Measuring Equipment – NOTICE OF APPROVAL**

I refer to previous communications regarding the application for AUS-MEAT to consider the above equipment with respect to its suitability for measuring fat in porcine at the P2 site in accordance with the requirements of the Australian Meat Industry Classification System (AUS-MEAT Language)

The Australian Meat Industry Standards and Language Committee (AMILSC), as the entity responsible for approval of measuring equipment, met 14 November 2018 to consider the suitability of this equipment against the approval guidelines.

I am pleased to advise the Committee has APPROVED the AUTOFOM III for P2 determination subject to the following conditions:

1. Capability of the AUTOFOM III to continuing to determine the P2 measurement.
2. That appropriate Quality systems are in place at each Establishment.
3. That individual AUTOFOM III installations may be subject to AUS-MEAT audits and that a failure to maintain the system to the approved system definition and/or calibration requirements may result in AUS-MEAT withdrawing or suspending approval for that system.
4. That inaccurate Assessments may result in AUS-MEAT to review the equipment.
5. That all AUTOFOM III units at AUS-MEAT Accredited Establishments are maintained to the approved hardware and software versions.
6. That AUS-MEAT is notified of (and approves) the modification of any hardware and software changes.
7. That, prior to installation, the conditions of this approval are presented to the Establishment Management at AUS-MEAT Accredited sites.
8. That all conditions of this approval are subject to audit by AUS-MEAT at its discretion.
9. That, with notice, AUS-MEAT may rescind or modify this approval at its discretion.
10. That AUS-MEAT must approve, prior to release, any AUTOFOM III marketing or promotional material which refers either to AUS-MEAT or this approval.
11. That upon request, AUS-MEAT be provided with access to a current version of the AUTOFOM III.

Yours Faithfully
