SERVICE SOLUTIONS // HOW TO

HOW TO ADJUST SENSOR
# SETTINGS ON YOUR AGOL

Adjust factory settings:

1. Keep Q pressed and power ON > 10 seconds until both yellow LEDs flash 3 X at the same time. - position A

Near distance adjustment:

1. Place, ex. a box on the conveyor belt, align the box with the edge of the conveyor belt for near distance measurement. - position B
2. Press Q > 3 seconds until green and yellow LED flash at the same time. - position A
3. Proceed to far distance adjustment.

Far distance adjustment:

1. Place, ex. a box on the opposite side of conveyor and align the back of the box with the conveyor for far distance measurement. - position C
2. Press Q > 1 seconds until green and yellow LED flash at the same time. - position A
3. Near and far distance adjustment are finished.
