HOW TO MAINTAIN EFFICIENT DEHIDING ON YOUR LOW CAPACITY HIDE PULLER

Ensure high performance with prolonged life-time by having your certified Frontmatec specialists verify the operational condition and tension of the dehiding chains, as well as ensure that the measurement of the guide roll meet the specified recommendations needed to achieve continuous efficient and high quality dehiding.

Maintain a smooth operation with a high level of safety with the help of your skilled and experienced service specialists, who know how to verify the function of the stop sensors, which is essential to ensure the precise end position of the chain, as well as approve the condition of the platform valves and cylinders for optimal flow and speed combined with a high level of safety.

Stay prepared for the unexpected by stocking critical spare parts for daily operation, such as pull-chains, dehidier rolls, cylinders, valves, bearings and stop sensors.
